

HOUSTON, TX, November 19, 2014 **/24-7PressRelease/** -- Eldred Sheet Metal Works LLC specializes in custom fabrications of carbon steel, stainless steel, aluminum, and various alloys. Eldred has successfully completed thousands of custom fabrication jobs over a period of more than 65 years.

"We do custom metal cones and cylinders, skid fabrication, press break forming, plate rolling, and angle forming," said Milton Smoot, owner of Eldred Sheet Metal Works. "Our shop has the capability to fabricate a skid from engineering drawings to ready to ship, but we also do smaller jobs for smaller, local companies. Quality is our main concern, whatever the project."

Eldred has the equipment to handle fabrication from gauge metal up to two inches thick. The multiple building shop has a high definition CNC plasma cutter, five press brakes from 80 to 600 tons, saws, numerous welding machines and a skilled team of fabricators.

About Eldred Sheet Metal Works: Eldred Sheet Metal Works was founded in 1946. Since that time Eldred has continued to refine and develop its fabrication offerings mainly for local and Gulf Coast projects, but has also completed large projects shipped internationally. From the fabrication of carbon steel piping to stainless steel or aluminum cones and strainers, there are very few metal fabrications outside the scope of Eldred Metal Works.
