

(PRLEAP.COM) Anaheim Hills, Calif. – August 21, 2013 – In today's technology-driven business world, it is important to have comprehensive, reliable IT support. Orange County businesses have relied on the IT services of the Anaheim Hills-based SACA Technologies for more than 15 years because they offer a comprehensive suite of solutions that can be tailored to meet the needs of the client.

"At SACA Technologies, we are dedicated to being our clients' IT Allies, delivering any and all IT solutions our clients might need," CEO Alexander Saca said. "While there are some companies that just fix computers or companies that specialize in recovering data after a disaster, SACA Technologies offers a full suite of IT services, including individual services such as IT support, security solutions and sales & procurement services, as well as our comprehensive Managed IT services."

Orange County clients have benefited greatly from SACA Technologies' managed IT services, an all-inclusive solution that includes network monitoring, performance monitoring, disaster recovery, automated services, security services, alerts & reporting, fixes & repairs and other forms of IT support. Some of the benefits businesses have seen from choosing Managed IT services from SACA Technologies include:

Reduced IT costs. Businesses that choose Managed IT services often save a lot of money on their annual IT costs. That is because the all-inclusive service is provided for a low monthly fee. This monthly subscription fee ends up costing businesses significantly less per year than it would cost to hire an in-house IT staff member or hire a freelance technician on an hourly basis.

A round-the-clock availability. SACA Technologies offers 24x7x365 live support. Whether your network goes down in the middle of the day or the middle of the night, SACA Technologies has a dedicated technician available to provide immediate solutions.

Experienced technicians.

The technicians who work for SACA Technologies are among the most highly skilled and highly trained technicians in the field. They are ready and equipped to fix any problem you may have with your IT infrastructure and have earned technical certifications in the areas of computer repair, networking, security and IT project management.

Solutions that are customized to meet the business's needs.

SACA Technologies understands that no two businesses are alike, that is why they offer solutions that can be tailored to meet the clients' unique needs. The Managed IT services offered by SACA Technologies are not just available to Orange County businesses, however. They also offer their services to clients throughout Southern California (Los Angeles, Riverside, San Diego and San Bernardino counties), as well as in Portland, Oregon and Mexico.

SACA Technologies has provided a comprehensive IT support Orange County businesses have relied on for more than 15 years. Their solutions include Managed IT Services, IT security, hosting services and computer repair. Thanks to a combination of remote, phone-based and onsite technical support, technicians are available 24x7. For more information, visit www.sacatech.com
