As a nationwide leader in temporary site service rentals, National Event Services is pleased to announce its complete line of

[portable restrooms](#)

for concerts, fairs, festivals, marathons, charity walks and other sporting events.

As every event is unique, a wide variety of toilet rental models have been designed to address nearly any imaginable need. National Event Services provide everything from portable restrooms equipped with foot operated freshwater sinks and hand-free flushing toilets, to those that are ADA compliant and wheel chair accessible for handicapable guests.

A unique alternative to the traditional porta potty is the VIP solar restroom. This deluxe solar powered unit is a roomier and more elegant alternative often used for weddings and large outdoor events with VIP tents. National Event Services also offers the luxury of multi-person comfort stations, perfect for formal events or those catering to higher end clientele. These restroom trailers are equipped with separate men's and women's restrooms and have convenient wheelchair access, each with air conditioning, heating and lighting.

In addition to a full line of portable restrooms, National Event Services also offers temporary fences, fence panels, privacy screens and crowd-control barricades. With more than 50 years of experience working with event organizers across the country, National Event Services has a proven track record as a trusted event industry leader.
