

(PRLEAP.COM) Orion Systems Integrators, Inc. (ORION), today announced that, based on a new relationship with Microsoft Corp., companies of every size can now purchase Microsoft Office 365 directly through [ORION](#) . Office 365 is Microsoft's most complete Office cloud service to date, and it's tailored to the needs and budgets of small, medium and large organizations. With the new Office 365 Open and full packaged product (FPP) subscription model, ORION can sell Office 365 subscription packages directly to organizations with integration and migration packages to help small and midsize businesses take advantage of cloud services.

Orion has a team of experienced integration and migration specialists who are experts in all facets of Office 365. Providing Office 365 product licenses and additional services adds yet another dimension to Orion's breadth of offerings that include IT solutions such as custom application development, mobility, cloud and IT staffing.

"The opportunity for small and medium businesses with Office 365 is huge. There is now an affordable and simple way to help customers use cloud services to expand their businesses while reducing IT complexity," said Moon Choi, Director, Business Development.

"Office 365 is on track to be one of the fastest-growing businesses in Microsoft's history," said Jon Roskill, Microsoft corporate vice president, Worldwide Partner Group. "We are excited to partner with ORION to bring Office 365 to businesses of all sizes."

About Office 365 Office 365 brings together Microsoft Office, Microsoft SharePoint Online, Microsoft Exchange Online and Microsoft Lync Online in an always-up-to-date cloud service. With Office 365, moving to the cloud does not require people to change the way they work because it's based on the familiar, industry-leading productivity tools people know and trust. Employees get new ways to work together with ease, on virtually any device or mobile phone,* using familiar applications such as Office that they already know and love. Business owners get the reliability, security features and IT controls they need in the cloud.
