

Star Helicopters Announces New Air Taxi Services

Written by Australian Business

(PRLEAP.COM) Los Angeles, CA – Star Helicopters, a popular Southern California helicopter tour company, is proud to announce it has received the necessary certification from the FAA to carry out air taxi services. Operating from a central location, only seven minutes from LAX and 15 minutes from Downtown, L.A, Star Helicopter [air taxi can quickly and safely transport clients](#) to their next business meeting or out of town event.

The FAA's recent approval of Star Helicopter air taxi services highlights the company's high operating, maintenance and safety standards. Star Helicopter pilots are experienced, qualified, certified and regularly re-certified by the [FAA to ensure passenger safety](#) . Star Helicopters operates the vast majority of these charter and air taxi helicopter rides as a dual-pilot operation with a pilot-in-command and a co-pilot. Point-to-point on-demand helicopter rides from Star Helicopters are always safe, comfortable, and punctual. Clients will also enjoy state-of-the art avionics and noise cancelling headsets for their comfort.

Air taxi service are an excellent option for busy business people, doctors, lawyers, entertainers and others who need to get around Southern California frequently. With the infamous Los Angeles traffic, air taxi can save a lot of time and stress. Star Helicopters can get clients very close to their desired destination with the ability to land in airports, helipads, parking lots and private facilities.

About Star HelicoptersAs Star Helicopters celebrates the beginning of the third year in business in February, 2012 it has grown from one helicopter and two pilots in 2009, to 8 helicopters and 8 pilots in 2012. Over these first two years the company has become the largest helicopters company in the Metro Los Angeles area, yet it still operates business with that small company hospitality and customer service.
