

Price Markets NDF Trading on Currenex ECN

PRL

(
EAP.COM
) City of London, September 25, 2013 -

Price Markets

, a trading name of London Capital Group, launches multi-bank

NDF

(Non-Deliverable Forwards) pricing on

Price Markets Currenex ECN

, providing professional and institutional clients direct access to multi-bank NDF liquidity via API and GUI.

Due to the increased demand in trading on EM (Emerging Markets) currencies, such as Indian Rupee, Malaysian Ringgit and Chinese Renminbi, Price Markets has launched its NDF offering on Price Markets Currenex ECN. This provides manual and algorithmic traders access to streaming prices and true multi-bank liquidity from the largest FX liquidity providers in the world.

Price Markets' Head of FX Sales, **Mr. Ed Anderson** stated "Following our recent successful Global Solutions launch we have seen a tremendous interest in our Integrated

FX Prime Brokerage

solution from a diverse client base. Specifically, there has been an overwhelming demand for improved access and liquidity to NDF pricing. We are excited to have met these requirements by offering clients the ability to source deep liquidity and highly competitive NDF pricing directly from 7 of the largest FX banks in the world via RFS (Request For Stream)."

Anderson continued "Price Markets' Prime Brokerage solution consolidates the FX liquidity and technology needs of today's sophisticated market participant by integrating [FX Spot](#) , [Forward](#) ,

NDF

and

Precious Metal

trades across 5 different FX ECN's into one single back-office via STP. This results in significant cost savings and price discovery opportunities for our clients".

Price Markets (UK) launches NDF Trading on Price Markets Currenex ECN
