

RealtyJuggler Real Estate Software Upgraded

Written by Australian Business

(PRLEAP.COM) [RealtyJuggler Real Estate Software](#) released another upgrade to their RealtyJuggler line of Real Estate Customer Relationship Management (CRM) products for real-estate agents.

This latest upgrade further improves upon the popular Valet Import capability. Valet Import allows agents to load leads from any data source with a single click. Members send RealtyJuggler a sample of their data by going to "Main:Settings:Valet Import." RealtyJuggler then creates a special menu item that the member can use to import their data with just a single click from that point forward. Valet Import can be used to load leads from the Multiple Listing Service (MLS), county tax records, or even lead services such as LandVoice and The RedX. The improvements include better data fidelity well as the ability to load MLS data into the Homes database.

The Email feed has also been improved for showings. Showing information can be automatically fed into RealtyJuggler from both Supra as well as Sentrilock lockboxes. This allows agents to track who has seen their listings and to solicit showing feedback. A service report can be also generated and emailed to the seller providing up-to-the-minute details of promotions, showings and showing feedback.

Over 50 additional changes have also been made based upon member feedback. One of the upgrades is the integration of Google Voice with RealtyJuggler. Agents can now dial any phone number in RealtyJuggler using using Google Voice. Skype phone support has also been enhanced as well.

Support for Google Drive, DropBox as well as Microsoft SkyDrive have also been added. This capability allows agents to store contracts and other documents using those poplar services and associate them with Listing and Closing records in RealtyJuggler.

RealtyJuggler also reports that the Council of Residential Specialists (CRS) recently reviewed RealtyJuggler and awarded them 4.5 out of 5 stars, an almost perfect score.

"We are tremendously proud of the steady pace of innovation of RealtyJuggler. This is our 25th upgrade since RealtyJuggler Realtor Software was released in September 2004. Valet Import, Google Drive and Google Voice support are just three examples of how we can innovate while maintaining our core principals of a low-cost, easy-to-use product, focused on the average agent." stated Scott Schmitz, President and CEO or RealOrganized, Inc. the parent company of

RealtyJuggler Real Estate Software Upgraded
