

Leading Experts to Present Green Design Webinars on GreenExpo365.com October 16

Written by Australian Business

(PRLEAP.COM) Seattle, Wash., October 3, 2013 – The GreenExpo365.com autumn online event on October 16 provides an easy-to-attend and free way for building professionals to learn the latest in green building practices. Perkins + Will Building Technology Researcher Ajla Aksamija, PhD, kicks off the day's AIA-registered continuing education webinars with a presentation on designing high-performance building facades. GreenExpo365 will be giving away copies of Dr. Aksamija's book "Sustainable Facades," via random drawing. Additional online educational sessions for the day include:"LEED V4 Update and Choosing the Right Path for Your Multifamily Project," presented by Kelsey Mullen, Director of Residential Building Development for the USGBC "Reaching Maximum Daylight and Ventilation," presented by Karen Davis of Milgard Windows and Doors For presentation times and the full schedule of events, visit GreenExpo365.com .

In addition to attending educational webinars, participants in the October 16 GreenExpo365 event will be able to interact with leading building product manufacturers on a virtual tradeshow floor. Registered users also have access year-around to the site's green building blogs from recognized experts, as well as more than 100 on-demand educational webinars (most of which are registered with the American Institute of Architects (AIA) for continuing education credit).

To stay up to date on the latest green building products, practices and trends, connect with GreenExpo365.com on [Facebook](#) , [Twitter](#) , [LinkedIn](#) and [YouTube](#) .
