

(PRLEAP.COM) Wheeling, WV – October 22, 2013: TROY Group, Inc., a **worldwide leader in the [check printing](#) and management of security documents**

will present industry-leading secure printing solutions October 20-24 at Gitex Technology Week in Dubai. TROY representatives will offer live demonstrations of TROY's advanced desktop imaging techniques including invisible secure UV printing, an innovative inkjet technology and application of TROY security features.

Gitex Technology Week is the top technology show in the Middle East, North Africa and South Asia region, with nearly 140,000 global participants browsing more than 80% of the top information technology brands in the world. TROY will share a booth with business partner Globalis, a leading global source of printing and banking solutions. TROY continues to develop progressive solutions that add unique fraud prevention features to printed documents. As a result, global demand for TROY solutions has increased significantly with the demand for advanced security imaging and fraud prevention techniques. Today, TROY exports to more than 120 countries.

TROY's exclusive industry-leading security features have placed the company at the forefront of the security document revolution, offering multiple layers of document security and fraud deterrence. **The patented TROY Copy Evident Pantograph** technology thwarts unauthorized copying of valuable or confidential documents. New TROY Variable Microprint offers an added layer of authentication by providing the ability to print text that appears as a line to the naked eye.

TROYMark™ is a unique watermark of user defined variable data, printed diagonally across the back of each document. These anti-tampering technologies work together to help prevent documents from being altered and can be applied to plain paper or specialty stationery. In addition, TROY offers security MICR and

[toners](#)

that are either indelible or react to alteration attempts by the use of solvents.

Three printer models will be on display at the Dubai event. The new TROY Secure UV Printer offers encryption technology that allows selected covert areas of a document to be printed in invisible ultraviolet (UV) toner that is visible only under a UV light. The [TROY SecurePro Jet Dx](#) combines TROY Copy Evident Pantograph, Microprint and TROYMark™, the quality and speed of a laser printer and the affordability of an inkjet printer for a cost-effective security printing solution. Also on display will be the

[TROY Secure DXi 3015 Printer](#)

, one of TROY's best-selling models in EMEA, MENA and Asia Pacific regions. Its 3-position key control allows authorized users to select standard HP printing functions, TROY security features or to lock out all print jobs.

According to TROY Executive VP and General Manager Larry Landtiser, his team is proud to present TROY's latest technologies on a global scale. "TROY continues to leverage its experience and expertise as the leading provider of secure output solutions," he said. "Today, our products and services include a full array of solutions capable of addressing international secure payment and secure printing processes."
