

### Advantage CCS: Goal Tracker Tool

( [PRLEAP.COM](http://PRLEAP.COM) ) Advantage CCS, an online credit counseling provider, has released a new online tool for budgets and savings: Goal Tracker. Goal Tracker provides users with ways to track spending and savings as well as the financial education to help people reach their long-term goals and develop good saving habits.

Users can set up their accounts in less than a minute and then immediately start to input their financial goals, such as saving up to buy a car, pay off a credit card, etc. Goal Tracker helps you formulate a savings plan by collecting information about the total goal cost, your initial savings, and either a deadline or the amount of money you can save per month. The tool will send out email reminders and monthly reports to help individuals stay on track with their savings goals and see the progress they've made on their goals at a glance. Savings can be transferred between goals to better manage priorities.

The tool is completely free, confidential, and not connected to your personal banking information, making it risk-free for users. Ultimately, the tool helps users develop and stick to goal deadlines by laying out a concrete savings plan for each goal as well as providing the tools to thoroughly track savings for individual items.

Individuals can sign up for the tool immediately by visiting: <http://onlinebudgetadvisor.com/> . There they can also access the Budget Builder tool, which helps users analyze their income and spending as well as create budgets based on savings goals. This tool is well-suited for long-term financial planning to free up cash or increase savings. Goal Tracker, on the other hand, is designed for users to set up specific goals to continue to work towards.
