

## TeamLab Office Rolls Out New Version, Gantt Chart Included

Written by Australian Business

---

### Coordinate Your Project using TeamLab Gantt Chart

( [PRLEAP.COM](http://PRLEAP.COM) ) TeamLab Office has announced the [new version](#) with a major addition aimed to meet the requests of the key audiences: project and sales managers.

The main release update will be of much interest to project managers, as it represents the most in-demand tool for tasks and events scheduling - [Gantt Chart](#) . Team leaders are now enabled to get a visualized picture of project progress, plan and analyse collaborative activities. TeamLab Gantt Chart shows tasks dependencies, thus managers are immediately notified of every shift and able to coordinate work according to the deadlines.

Sales people will benefit from close integration between TeamLab email aggregator and crm system. From now on it's possible to import email conversation threads and send messages to the client directly from the his profile page. An essential detail has been added: every customer contact is now assigned to a certain employee, so the project manager can see the responsibility area of every sales person.

According to Alexandra Petrova, Head of Marketing, the company's roadmap includes partners program release, document editors major updates and TeamLab PM for Android.
