) AIP Custom Builders and Remodelers announce their newest partnership with PBS Construction, Inc. in Florida. AIP is excited to be partnering with this experienced and innovative company.

As a concierge builder since 1986, PBS Construction has been working in residential and commercial construction projects in Southwest Florida. They are firm believers that by acquiring their customer's trust, they will have a successful home renovation. AIP Custom Builders and Remodelers, based in Lake Bluff, IL specializes in Custom Home Renovations for active adults, seniors, or those with mobility concerns. With the addition of PBS Construction, AIP Custom Builders now service the cities and suburbs of Chicago, Phoenix, and Naples, FL. Each AIP Builder Partner has over 25 years of custom home renovations and remodeling experience including expertise in accessible kitchen remodeling, bathroom renovations, accessible home modifications, independent living solutions, and home mobility solutions. They create aesthetically pleasing home renovations and innovative barrier-free living environments.

Bart Zino, the company's president gets personally involved throughout every phase of PBS's home projects. He helps guide the skilled and experienced team of accredited and licensed professionals who use only the highest quality in their craftsmanship. As Certified Aging in Place Specialists, PBS also utilizes the principles of Universal Design with their accessible kitchen and bathroom renovations and modifications.

PBS Construction, Inc. are experts at controlling cost for their customers and at giving customers the most accurate time frame for their project. They always want their customers to know what is expected so they can plan accordingly. PBS Construction specializes in custom kitchen remodeling, bathroom remodeling, home additions, in-law suites, patio enclosures and guesthouses.

Special services that PBS Construction, Inc. provide include fixing homes and buildings that have sustained damage from hurricanes or lightning. They also are specialists in mold remediation, LEED projects (Leadership in Energy and Environmental Design), and helping make structures weather ready.
