

Advantage CCS has received their license and approval in Nevada

Written by Australian Business

(PRLEAP.COM) The credit counseling license and approval process can be full of strict rules and all guidelines must be followed. These rules can vary between states and in some of the states it seems almost impossible to obtain a license because of all the paperwork. However, Advantage Credit Counseling Service has received their license in all but 3 US states. Their goal is to become fully licensed in all 50 states before the end of 2013.

Advantage CCS is proud and excited to receive approval in Nevada. They can help more consumers get out of debt and find financial freedom. Nevada is widely known for gambling and many people have lost it all trying to "beat the house". Here's an interesting fact; in 1999 Nevada had over 205,000 slot machines operating. That is roughly one machine for every ten residents. It's safe to say that some individuals living in Nevada may benefit from [credit counseling](#).

Gambling is just one reason people can plummet into debt. There's a whole other list of causes including medical issues, high interest rate mortgage loan, job loss, addiction, so on and so forth. Whatever the reason or reasons may be, anyone can benefit from a free credit counseling session.

Nevada residents now have another choice for debt relief. If applicable, some credit counseling clients will be a good fit for a Debt Management Program. On the Advantage CCS debt management program, consumers can expect to receive several benefits like making a single monthly payment, lower monthly payment, pay down debt in just 3-5 years instead of 10 or 20 years, and an end to the harassing collection calls.

About Advantage Credit Counseling Service –
