

# Mexico Bariatric Center Celebrates Its One Year Anniversary as a Medical Tourism Operator

Written by Australian Business

---

( [PRLEAP.COM](http://PRLEAP.COM) ) December 12, 2013 - Mexico Bariatric Center (MBC) opened its doors in October 2012. Since then, MBC's goals have far exceeded the goals it had originally set in their first year. MBC has become a prominent medical tourism facilitator focusing on the patient experience, quality of care and providing first class service. Mexico Bariatric Center has helped [nearly 1,000 patients with their weight loss surgery journey](#) to a new life. Having a clear direction and a vision for its future, MBC hopes to continue contracting with the best doctors and hospitals around the world and expand globally.

"Since Mexico Bariatric Center's inception, we've worked hard to filter and to work with only the best bariatric and metabolic surgeons in Mexico," says Ron Elli, Ph.D., Founder and President of Mexico Bariatric Center. Ron Elli, Ph.D., continues, "We work with surgeons who cumulatively have 35 years of bariatric experience performing over 15,000 weight loss and metabolic surgeries, surgeons who are ASMBS [American Society for Metabolic and Bariatric Surgery] Certified - our surgeons are the most [trusted surgeons in Mexico](#) ."

Mexico is in the forefront of bariatric surgeries. The technology and expertise is years ahead of what is yet available in other countries. Our patients have taken it upon themselves to do extensive research, are well-educated about their surgery options and they choose us for our surgeons and our facilities. Many of our patients are doctors, nurses, and health-field related employees from United States, Canada, England, South Africa, Costa Rica and Europe and many agree the quality and care they received was far superior to anything they have ever experienced.

**Our Rating and Patient Experience**We strive to provide to give our patients all of the tools necessary for a successful surgery. "Our average weight loss six-months after weight loss surgery is 80 lbs. This is due in part to our skilled surgeons and in part to the aftercare our patients receive. We have an in-house certified nutritionist who can give quality after-surgery support and advice. We are the only company to offer comprehensive case studies, to help educate patients about surgeries and their options," says Ron Elli, Ph.D.

**Surgeons We Represent**We represent the pinnacle of medical tourism bariatric surgeons: Dr. Alejandro Lopez, Dr. Louisiana Valenzuela, Dr. Jacqueline Osuna, Dr. Ismael Cabrera, Dr.

Carlos Diaz, Dr. Jamie Ponce de Leon, Dr. Salvador Ramirez and Dr. Carlos Altamirano.

**Mexico Bariatric Center**We provide all weight loss surgery options including: gastric sleeve, gastric bypass, duodenal switch, [mini-gastric bypass](#) , gastric balloon, gastric plication, gastric banding, rescue surgeries (to correct damaged surgeries) and revisional surgeries in all of our Tijuana, Guadalajara, and Puerto Vallarta.

Mexico Bariatric Center is a medical tourism facilitator helping patients receive quality care at an affordable price which is often not available in their own country. In many countries, patients have to wait up to five years for their gastric weight loss surgery appointment. For some this could be the difference of life or death and for others it is just a matter of a new beginning, a second chance so to speak. Many of our patients regret putting it off for as long as they did and wish they had done it sooner - so contact us at [1-855-768-7247](tel:1-855-768-7247) or visit [MexicoBariatricCenter.com](http://MexicoBariatricCenter.com)
