

(PRLEAP.COM) Anaheim Hills, Calif. – December 27, 2013 – Many technology experts are predicting the continued growth of mobile devices in 2014. As a Microsoft Solution Provider, SACA Technologies (known for its Managed Services Orange County solutions) can provide businesses with the means for protecting and managing their mobile devices, including tablets and cellphones manufactured by Microsoft (as well as those tablets and cellphones not manufactured by Microsoft, but using a Windows-based operating system).

"With the proliferation of mobile devices being used in the business sector, it is critical for companies to have an IT service provider that can manage and secure those devices," Alexander Saca, CEO of SACA Technologies, said. "SACA Technologies is proud to be a certified Microsoft Solution Provider, a title that guarantees our technicians can help provide the highest-quality IT services for our clients' Microsoft and Windows-based devices."

While SACA Technologies can provide security solutions and IT service and support as standalone services, their Managed Services solution is the ideal solution for businesses looking to outsource the management and security of their entire IT infrastructure, including mobile devices.

While security is always a consideration for businesses, mobile device security is one area of great concern for many business owners and managers. The comprehensive security features included in SACA Technologies' Managed Services include around-the-clock network and performance monitoring, network firewalls, intrusion prevention and detection systems, data backup and disaster recovery.

In addition to increasing the security of their IT infrastructure, businesses must also make sure their mobile devices are maintained regularly. When a device is well-maintained, it will perform at its optimum level for much longer than a device that is not regularly maintained (this is especially good news for businesses that provide their employees with mobile devices since it means that the device will last longer, which in turn means the business will spend less money). With Managed Services from SACA Technologies, businesses receive technical support and maintenance for their Microsoft mobile devices.

Businesses wishing to make better use of mobile devices should contact a SACA Technologies sales representative today at (888) 603-9030 or sales@sacatech.com to find out more about their Managed Services solution.

About SACA Technologies

SACA Technologies is a provider of IT support and Managed Services Orange County businesses (and businesses throughout Southern California) have relied on for more than 15 years. Managed Services (their most popular solution) is a comprehensive suite of IT solutions that includes infrastructure monitoring, security, computer fixes & repairs, disaster recovery, alerts & reporting and automation.
