

## Accents Perfect Translations Notices Increase in Health Plan Translations

Written by Australian Business

---

( [PRLEAP.COM](http://PRLEAP.COM) ) Newington, CT – [Accents Perfect Translations](#) , a nationwide language translation services company, had a significant increase in translations of health plans. This is due to the Affordable Care Act, which gives the lower income population an ability to purchase health care.

The Affordable Care Act helps those who were not offered, or could not afford, the ability to enroll in health care plans for reasonable rates. Enacted this year, it uses the family's income level to determine a monthly rate due. This is one of the first steps in making health care available to all Americans. The lower income population that this affects includes Hispanics, Latinos, and other ethnicities where English is not their first language. It is because of this that Accents Perfect Translations is completing more Spanish medical translations specifically on what the health care plans offer.

Accents Perfect Translations offers language translation services in a Spanish, Russian, and many other languages. Along with Health Care Plans, they also offer a certified translation for medical needs, general health care, and hospital programs. The company is proud to help those who need the translations, especially when it comes to the Affordable Care Act.

Accents Perfect Translations says, "The country is now ensuring everyone has equal access to health care. We are proud to offer Health Care translations services to those in need across the country. It gives us the opportunity to make sure each person is receiving the care optimal for them."

Though it was estimated that the Affordable Care Act would prompt an increase in translations, Accents Perfect Translations did not realize by how much. Though fewer people have registered for the Affordable Care Act than anticipated, there is still an obvious impact that can be seen through these translation needs. The company can be contacted for a free quote, if you need foreign language translation for any type of document.
