

The US-based SIMCO offers value added services for ultimate customer satisfaction

Written by Australian Business

(PRLEAP.COM) SIMCO is developing strong partnerships with our customers through delivering parts of the best quality possible and on time, in order for our partners to be able to stay competitive.

SIMCO is a family run company with over 30 years of history in producing high-quality plastic enclosures. The company was founded in 1982 by Joe and Drema Zimmerman and ever since the untimely death of Joe Zimmerman in 1995 SIMCO has been run by Drema Zimmerman. It may seem unusual for such a big manufacturer in the technical field to be run by a woman, but employing the strong family values and ethics into the business has helped make SIMCO one of the most reliable and respected manufacturers of electronic enclosures in the industry.

Today, the product range of SIMCO includes over 100 models of plastic enclosures manufactured according to all the standards and regulations of the USA and the EU. The company has experience in molding ABS, Polystyrene and other Thermoplastics. For information about pocket size plastic enclosures visit: <http://www.simcobox.com/Pocket-Size-Enclosures.html>

Apart from off-the-shelf solutions, we also offer customization options and value-added services to bring our customers exactly what they need. Some of these services include custom machining and assembly, pad imprinting and EMI/RFI shielding options. The entire manufacturing process is done in the US – in Avon Park, Florida under strict supervision.

Since SIMCO is the manufacturer of all the products offered by the company, we have considerably shorter response times and sell directly to the original equipment manufacturers, which also brings down the overall price of the products that the OEM customer has to pay. This also speeds up the product's entry onto the market. SIMCO offers free samples and user drawings upon request. The friendly staff of the company can guarantee you quality products, excellent service and complete dedication to customer satisfaction. You can contact us through our website (<http://www.simcobox.com/>) or via telephone or email for a free sample and quote.
