

## Orlando Accounting Firm Now Offering Innovative Payroll Services

Written by Australian Business

---

[Padgett Business Services of Orlando is proud to add PAYO® payroll services to its stable of business products.](#) ( [PRLEA P.COM](#) )

) Orlando, FL - Padgett Business Services is proud to offer a new and innovative [payroll service](#) to help small business clients run their companies more efficiently.

Padgett Business Services of Orlando has long been known for its commitment to customer service and dedication to clients. They already offers a full range of financial services to business clients in the Orlando, FL area, from [tax preparation](#) and planning to [outsourced CFO services](#) and are proud to now offer payroll services to help business clients save money, manage cash flow more effectively, control risk, and get more done.

Firm owner, Toni Donahue, understands the impact payroll services have on the bottom line, and how small businesses everywhere struggle with this essential business function. Toni states, "Padgett Business Services of Orlando has already helped many small businesses in our area to outsource their payroll services. We love helping our clients to save money while minimizing hassles associated with routine payroll processing and ensuring that they remain compliant with all regulations and tax laws."

In addition to its payroll services, Padgett Business Services of Orlando is now able to offer something truly innovative and unique for business owners — the PAYO® (Pay-As-You-Owe®) service. PAYO® lets employers pay their workers' compensation premiums through an approved payroll company, based on what is actually owed for each pay period. There is no deposit or down payment required, which makes it easy for businesses to get started with no outlay of precious capital.

"Companies can improve their cash flow with our innovative approach to payroll services. Since workers' compensation payments are based on actual payroll and not annualized estimates, businesses pay what they owe, and only what they owe. With help from our firm and from PAYO®, our clients don't need to pay workers' compensation premiums in advance, so they don't waste any money," Toni adds.

Adopting this approach to payroll services also means no checks to write and no invoices to pay. Small businesses can also use Padgett's PAYO® payroll services to reduce risk and

minimize the chance of an audit. Toni understands that managing payroll services and workers' compensation premiums is not easy. She explains, "We work hard to make the process more streamlined. Our payroll services take a different approach by basing payments on actual experience so our small business clients can get the accurate calculations they need to run their businesses without the anxiety of wondering if they processed their payroll correctly."
