Step by step video of "How to Refinish and Repair Quartz Countertops."
Demonstrated by an industry professional in quartz refinishing and repair.

(PRLEAP.COM) April 16, 2014 - Vancouver, BC - WerkMaster develops a process to refinish and repair quartz countertops or surfaces utilizing the Scarab and a proprietary diamond abrasive resin formulation and design to quickly and professionally refinish damaged quartz countertops.

What is the significance of this video? It demonstrates how to repair a quartz countertop in the home, something that up to now has been extremely costly to repair. In many cases, the countertop would be replaced at a tremendous expense to either the fabricator, installer or customer. Working with our diamond tool manufacturer and Caesarstone; a unique, proprietary system was developed to effectively do the repairs, quickly, inexpensively while delivering professional results.

Caesarstone were the first to develop quartz countertop technology. They have been searching for years for a solution for repairing their products for their fabricators, installers and customers. While viewing the video, Bob Cameron of Caesarstone will give you a Step by Step process on obtaining the best results using our proprietary diamond system.

About Caesarstone: Founded in 1987, Caesarstone was an early pioneer of the natural quartz surfaces market. Its dominant position in the market has been achieved through continuous investment, extensive research and development, highly trained personnel and an advanced market infrastructure.

Caesarstone evolved a new kind of work surface by adding quartz to the Bretonstone process. The manufacture of slabs from a mixture of ground quartz aggregates, pigments and polymers proved to be the unique components necessary for this new generation of surfacing. As a result of this advanced technology, Caesarstone is able to provide improved products with unprecedented physical properties superior to those of marble, granite and other manufactured surfaces. For more than a decade Caesarstone has set new standards in innovation and craftsmanship and continues to set the trends in the industry. For more information www.Caesarstone.com

About WerkMaster: WerkMaster is an innovative manufacturer of equipment for the stone, concrete, terrazzo and hardwood refinishing industry as well as a complete CFIA certified line of
