

BVA Scientific Broadens Their Product Line by Offering Reagent Salts

Written by Australian Business

(PRLEAP.COM) BVA Scientific has recently broadened their product line to offer Reagent Salts from market leader, ChemProducts USA. [Chemical supplies like Reagent Salts](#)

are offered by BVA Scientific in granular and crystal forms. Lithium chloride granular reagent salts and potassium iodide crystal reagent salts are both currently in stock at BVA Scientific. Both versions of Reagent Salts come in 500g quantities. These Reagent Salts can be added by scientists to experiments to determine if a chemical reaction occurs.

BVA Scientific chose to offer Reagent Salts from ChemProducts USA because of their strong reputation in the chemical supply market. ChemProducts USA has been providing chemical supplies to scientists and organizations for over 20 years and continues to supply only the highest level of reagent salts. More information can be found about BVA Scientific at: www.bvascientific.com

About BVA Scientific BVA Scientific is a distributor of laboratory equipment and supplies. With over 100 years of combined knowledge, BVA Scientific can often provide companies with hard to find chemicals and supplies that other distributors are not able to procure. In business since 1989, BVA Scientific continues to grow by providing a high level of customer service, along with a large line of scientific products.
