Steve Smith, Director of Combined Knowledge says 'This year we wanted to bring the conference to our customers and provide organisations with a cost effective way to educate their teams on their doorstep. We have priced the conference in a way that allows companies to send multiple people from across their business units including technical, end user and business leaders to the roadshow events to enable the company to get a complete picture of the questions and challenges posed by SharePoint and the Cloud. Many companies cannot afford to send a lot of their team to the multi day conference in London so by bringing the roadshow close to you we hope it enables you to send all the right people to the events near to your offices.

The Evolution Roadshow provides just that, an opportunity to learn from some of the industry's top SharePoint speakers, with tracks and content dedicated to multiple roles within the SharePoint environment. The format of the roadshow helps organisations to educate their teams on SharePoint, Office 365 and the Cloud without the need for extensive travel.'
