

Moving Software Lead Manament

(PRLEAP.COM) May 6, 2014 - MoverworX offers the moving industry's the [best solution](#) to maintain and grow their companies. Streamline logistics and support and serve customers more efficiently.

If there is one industry where the exact control over every component is critical, it would be the moving and freight industries. Moving goods and equipment requires a large amount of logistics and logistical [control](#) and the ability to do this quickly and efficiently is critical.

In today's digital world, there are new technologies that allow people and industries to take full advantage of current technology. MoverworX moving software has been specifically designed to give the moving and freight companies the maximum amount of control, flexibility and growth potential while combining state of the art computer, Cloud and mobile features into one powerful, reliable and [affordable package](#) .

"We want to give our customers every possible advantage," said Uri Levy of MoverworX, "and we have created a very powerful package just for them. We've taken a leadership position in our industry because we deeply understand our clients' needs, wants and goals both for today and tomorrow."

Because of the ever-growing reliance on [Cloud and mobile](#) , MoverworX combines all aspects of business management into a fully-integrated software system. MoverworX features a host of solutions and tools that would be essential to any server-based system, but offers unmatched and critical functionality when combined with mobile and The Cloud.

MoverworX gives any moving or freight company, no matter how large or small, the ability to totally manage the business from anywhere with a smart device. From lead generation to booking, from closing projects to dispatching, from accounting to payment processing, MoverworX leaves nothing to chance.

Some of the features of MoverworX include :

Advanced customer account creation and management with built-in maps and routes Process credit card payments from anywhere. Very handy when scheduling a project right in a customer's home or business. Handy and integrated marketing tools. Complete emailing system with single-click capability. [Automatic quote generation](#) features Automatic creation and management of bills of lading Completely manage vehicles, equipment and supplies While hardly a complete list, it's clear that MoverworX has thought of everything and continues to find new and innovative methods for [serving its customers](#)

. All of the features mentioned are completely tied into one system, so the information and data management is in real time. An employee in the field can access and change data with a tablet and that alteration instantly appears to another employee at the home office. For the fast-paced and rapidly changing moving and freight industries, MoverworX represents a critical component to their success.

About MoverworX Software MoverworX is an advanced high-tech development firm that provides a fully-integrated software solution for moving companies both domestic and international, freight companies and storage companies. This innovative software system incorporates sales, marketing, operations and management capabilities that gives the company total control over its logistics by providing integrated modules and real-time data.
