

BVA Scientific, Inc. Now Offers the Thermo Scientific Orion Versa Star Meter

Written by Australian Business

(PRLEAP.COM) May 14, 2014 - SAN ANTONIO, TX – BVA Scientific, Inc. is widely considered to be an industry leader in the scientific supply community. This reputation will only be further burnished by the company's recent announcement that they are now offering the superlative Orion Versa Star meter at an unmatched price.

The Orion Versa Star meter sets the bar for reliability and accuracy in a water sample testing device. This meter can be used to test water pH, conductivity, dissolved oxygen content, and more; it can also test multiple aspects of water samples simultaneously, saving time and effort. The Orion Versa Star meter has a multilingual interface allowing scientists and researchers from around the world to easily use the device. It supports English, Chinese, German, Spanish, French, and Italian. And with the capability of storing up to 2,000 individual data points, indeed researchers around the globe regularly select the Orion Versa Star meter for their field and lab work.

BVA Scientific, Inc. offers a full range of lab supplies, ranging from hydrometers, culture tubes, and even basics like lab gloves all the way to more advanced chemistry supplies and microbiology supplies. Labs and researchers across the country and internationally know that when BVA Scientific offers a product, they have thoroughly vetted it with research and testing. The exceptional pricing the company offers on this device is far from the only reason customers choose BVA; the company's devotion to customer service and its reputation for standing behind its products is the true metric for their success as a major supplier of biology and chemistry lab supplies.

About BVA Scientific, Inc. Now nearing their 25th anniversary in business, BVA Scientific, Inc . is an industry-leading full line distributor of biology and chemistry lab supplies. Based in San Antonio, TX, and serving the scientific community here in the United States and certain labs and researchers in the international community, BVA has earned a sterling reputation as a seller boasting both fair pricing and reliable products.
