

### [Wind turbine work at height and rescue training at heightec Leeds.](#)

( [PRLEAP.COM](#) ) May 30, 2014 - Work at height specialist

heightec are proud to announce the opening of their latest Height Safety Centre in Leeds. This new facility has been purpose designed to meet increasing demand for specialist training in height safety rescue and across the East of England.

The Leeds centre will focus on the delivery of training for the onshore and offshore renewable sector, offering RenewableUK (RUK), Global Wind Organisation (GWO) and Industrial Rope Access Trade Association (IRATA) accredited training. It will also serve telecoms, construction, and emergency services, as well as more general work at height sectors.

This new Height Safety Centre boasts nearly 8,000 square feet of training facilities and classrooms, with comprehensive range of training structures including a wind turbine simulator, elevated platforms, scaffolding, suspended steelwork, a large range of ladders and internal and external towers.

"The addition of this latest Height Safety Centre to our national network is a response to requests from clients and continually increasing demand for our services" said Keith Jones, Managing Director. "We're very excited about our latest expansion. This new venue allows us to further support our client base in the east of the country, with more readily accessible specialist training, a reduction in staff travel time and a consequent reduction in overall costs"

Courses that will be available at Leeds include:

Full range of Global Wind Organisation/Renewable UK work at height & rescue courses Rope Access – IRATA and ISO standards Roof Safety Industrial rescue (RescuePack) Tower climbing, rescue & RF awareness PPE Inspection, Managing Work at Height and First Aid heightec offers the most diverse and comprehensive training facilities in the world for work at height and rescue through venues in Aberdeen, Birmingham, Kendal, London and Leeds. Clients include multi-national corporations, government departments, emergency services, small businesses, private companies and individuals.
