

## Easy Recycle Store Now Accepts Bitcoin as Payment

Written by Australian Business

---

( [PRLEAP.COM](http://PRLEAP.COM) ) June 4, 2014 - [Easy Recycle Store](http://Easy Recycle Store) , a nationwide electronics recycling company based in New Century, Kansas, is proud to announce that it is the first US electronics recycler to accept Bitcoin as a payment option.

Residential consumers and small business owners can now recycle obsolete electronics, including old computers, CRT monitors and smart phones with the digital currency. Once items are selected and placed in the customer's shopping cart, Bitcoin is available as a payment choice along with Visa, MasterCard, American Express and Discover.

" We believe that digital currency will be an important part of the future and Easy Recycle Store is excited to be the first electronics recycler to accept it," said Kory Bostwick, president of PCDisposal.com LLC, which owns the Easy Recycle Store brand. "Bitcoin offers an additional convenience to our customers and gives them one more reason to recycle electronics and protect the environment."

Making recycling convenient and simple has always been the mission of the Easy Recycle Store. Through the website, customers pick which items they want recycled, select needed shipping boxes to be delivered to their door, and schedule a date for pickup.

Easy Recycle Store is the consumer division of [PCDisposal.com](http://PCDisposal.com) (PCD), one of the oldest and largest technology recycling firms in the industry. PCD provides asset retirement services for companies of all sizes throughout the United States and Canada, including Fortune 500 companies and U.S. government agencies. PCD is an R2 Certified responsible recycler.

Kory Bostwick founded PC Disposal in 1998 because he was concerned that there were few environmentally-friendly options for companies that wanted to dispose of the toxic glut of obsolete computers that were filling offices and, ultimately, landfills.

All of PCD's security, disposal and recycling methods are fully compliant with HIPAA, HITECH, Gramm-Leach-Bliley, FACTA Red Flags Rules and Environmental Protection Agency rules.
