

Berger Allied Offers Corporate Relocation Services with Updated Technology

Written by Australian Business

(PRLEAP.COM) June 9, 2014 - Berger Allied Transfer and Storage has been helping government agencies and corporations move for more than 100 years, and has recently updated their technologies and processes to provide for smoother employee relocation. They operate on the principle that clients aren't merely moving their things, but they are moving their lives, and the company strives to provide a service that is conducive to that.

Employee relocation services include local, long distance, and international moving, a single-point-of-contact move coordinator who acts as a liaison, short and long-term storage, superior protection of your things, climate-controlled transportation, air-ride suspension vans, and much more. Some of the latest technologies that have been integrated are computerized shipment tracking systems that provide customers with online shipment tracking; a computerized, bar code inventory management system which improves asset management; satellite tracking and email for improved communication with drivers; and handheld computers that allow in-home surveyors to provide accurate, timely estimates.

These technologies represent some of the most recent developments in the moving industry, and will make corporate moves easier, faster, and more convenient. Customers will be kept up-to-date more easily and often than ever before. For more information about Berger Allied Moving and their new corporate relocation services, including employee relocation service technology, visit them online at <http://www.bergerallied.com/corporate-relocation/services.htm>.

Berger Allied Berger Transfer and Storage has been the mover of choice for corporations, individuals, and government agencies since 1910. With over 100 years of experience as a one-source provider of storage and transportation needs, they have developed a system that is reliable and efficient. They strive to continuously integrate the latest technology to minimize costs and streamline relocation processes. There are 17 offices located across the U.S. and more than 600 vans that help move over 24,000 families, in addition to corporate clients, each year.
