

BVA Scientific Offers Toxicology Lab Supplies for Blood and Urine Screens

Written by Australian Business

(PRLEAP.COM) June 21, 2014 - San Antonio, TX – Toxicology screening is performed on either blood or urine to determine if drugs are still present in a person's body and to what degree. Considering the interactions that can result if drugs are already present at the time a new drug or drugs are introduced, assuring that a patient is "clean" is a vital step for their safe treatment. Treatment for drug abuse often requires the administering of new medications that should only be used once the drugs being abused are completely removed from the body. The vast selection of lab and microbiology supplies from BVA Scientific ensures you will have what you need for regular use you can count on for your patients.

BVA Scientific has been providing a full line of lab supplies, including those needed to perform basic toxicology screening to detect the presence of drugs. They have the syringes, needles, urine collection tubes, specimen cups, and more to ensure you have the equipment you need when you need it. Their inventory includes a variety of general lab supplies and lab equipment that can be used in a variety of laboratory settings. Their expertise in the lab business qualifies them to help you determine which products you need to keep on hand for your specific use.

If you want fast, reliable service you can depend on, turn to [BVA Scientific](#) for the quality products you need for toxicology testing, food safety, microbiology, environmental, and other industries that rely on lab procedures to maintain safety or health. When people's well-being relies on your quality and availability of lab supplies and equipment, purchasing from the company with the experience and the know-how to assist you in making the best selection can have a big impact on the quality of your results.

BVA Scientific's mission is "To bring value beyond the catalog to laboratories through consultative options, personal attention, and proven products."
