

FRANKLIN, Tenn., Sept. 23, 2013 /PRNewswire/ -- Video Gaming Technologies, Inc. (VGT), a top manufacturer of gaming equipment, today announced its first field trial of the new *XSpin*

™ gaming system at the River Spirit Casino in Tulsa, Okla.

First day results for the new

XSpin

™ games

Frankenstein

™ and

Lizards on the Loose

™ have far exceeded any other new game launch in the 22 year history of VGT.

"River Spirit is happy to be the trial site for the *XSpin*™ platform," said Jerry Floyd, general manager of River Spirit Casino. "Customers seem to like the new video product ... As an operator, we are pleased with the initial results and are ready for additional new and exciting products from VGT in the future."

The *XSpin*™ gaming system offers players an entirely new level of brilliance in visual experience and animation in gaming. Fitted with dual 21.5" high-definition video monitors, an ergonomic design and an enhanced sound system, *XSpin*™ was created to increase player comfort and provide a gaming experience that is unparalleled in the industry.

XSpin™ utilizes the latest technology and is housed in a sleek cabinet designed to provide for ease in maintenance, including faster currency drops and ticket paper changes. Driving next-generation gaming on VGT's player-proven *Live Call*® Class II system, *XSpin*™ introduces a Class II gaming device with appeal beyond that of Class III gaming.

"The *XSpin*™ gaming system is the largest multi-year development initiative in VGT's history, and we think *XSpin*™ is perhaps the best Class II gaming system in the world today for casino operators," said Jon Yarbrough, founder and CEO of VGT. "Our development teams pulled out all of the stops to deliver this system to our customers, and we're excited to be able to showcase it at the Global Gaming Expo (G2E®). The

debut of *XSpin™* is just the first salvo in what we expect to be an incredible new round of Class II gaming manufacturing by VGT."

James Starr, Senior Vice President of Sales, added, "*XSpin™* is the best game launch I've experienced since joining VGT. As soon as they were turned on, the games were being played non-stop. Excitement about *XSpin™* is spreading among casino operators across Oklahoma, and there have already been inquiries from operators about getting our new games, *Frankenstein™* and *Lizards on the Loose™*, onto their casino floors. *XSpin™* is going to be a game-changer for VGT."

About Video Gaming Technologies, Inc.

VGT is the number one manufacturer of Class II gaming devices in the United States and the number one provider of gaming devices in the State of Oklahoma, the third largest gaming market in the U.S.A. Founded by owner and CEO Jon Yarbrough in 1991, VGT is the largest, privately-owned gaming manufacturer in the United States. Headquartered in Franklin, Tennessee, VGT employs approximately 625 associates at its facilities in Franklin, Tulsa, its state of the art game design and development studio in Reno, and at its subsidiary company, Red Ball Gaming, in Mexico.
