

MARATHON, Fla., Nov. 4, 2013 /PRNewswire/ -- TikiLIVE.com is now delivering HBO, Showtime, and Complete Sky premium channels to Telergy Set Top Boxes (STBs). TikiLIVE has also been approved to deliver Sky channels to televisions domestically within the US via their HD broadcasting middleware platform.

TikiLIVE publishes 1080i HD video and can now deliver reliable streams efficiently to viewers all around the world. Now content can even be delivered through television sets with Telergy's affordable, Wi-Fi and hard-wired, Ethernet-compatible STB. The Telergy STB has Power-over-Ethernet (PoE) options that eliminate the requirement for an AC power outlet.

"We can now invite all Telcos, CDNs and Service Providers to offer Premium HD content with their offers in order to increase subscriptions to unparalleled levels," said Tim Green, CIO of Eyepartner.

This opens brand new doors for Internet Service Providers (ISPs) who want to offer content on multiple platforms. Not only are the streams accessible over the web, but also on televisions when viewers have Telergy's super-fast, HD box.

Telecommunication companies can play their content on televisions all over the world by becoming a TikiLIVE Content Operator. TikiLIVE has companies from Africa, Mexico, the Caribbean,

South America

, and

Central America

placing orders to get started with their own IPTV service. TikiLIVE offers LIVE streams and channels, and allows broadcasters to easily brand, manage, and monetize HD content. With a library of 1,800+ recent HD, Video On Demand (VOD) titles, the TikiLIVE VOD package enables customers to choose from an "all you can eat" library based on a monthly subscription.
