

Tipard Releases DVD Cloner for Mac to Fulfill 1:1 Ratio Copy with Fast Speed

Written by Australian Business

BEIJING, Nov. 23, 2013 /PRNewswire/ -- Tipard, a top-ranking and professional DVD/video converter and transfer software provider, today announced the release of DVD Cloner for Mac. It is a professional DVD copy tool to fulfill a 1:1 ratio copy with fast speed. With this Mac DVD Copy, you can easily clone DVDs to DVD discs, backup DVDs to a computer and burn ISO or DVD folders to DVD discs.

Tipard DVD Cloner for Mac, a multifunctional and easy-to-use DVD copier, is highly compatible with DVD discs. It can copy DVD discs (DVD-9 to DVD-9, DVD-5 to DVD-5, DVD-9 to DVD-5) and backup DVD discs to a local computer as DVD folders or DVD ISO image files as well as copy DVD folders or ISO files to DVD discs. Besides, the copy quality is almost the same as the original ones, which can be reached 1:1 ratio.

This DVD Cloner for Mac also allows you to copy DVDs with different modes: Full Copy, Main Movie and Customize. "Full Copy" enables you to copy the whole content of the DVD and the selection of titles; audio tracks and subtitles is not available for this mode. "Main Movie" helps you copy the main movie of the DVD without the titles and just keep the main movie title automatically while the audio track and subtitle for main movie is not selectable. "Customize" provides you with the flexibility to decide which part should be copied or not and all titles, audio tracks and subtitles are optional.

Plus, Tipard DVD Cloner for Mac is easy to use. Its straight-forward design won't confuse you. Only three steps are needed to finish the DVD copy task - select source, choose target and start to copy DVD finally. Its built in player lets you preview the DVD movie and you can task a snapshot of the DVD frame to save as different formats of image like JPG, PNG and BMP.
