

Window Replacement Company In San Antonio Announces New Green Campaign

Written by Australian Business

San Antonio, TX, /PRNewswire-iReach/ -- Green Energy Of SA, a company headquartered in San Antonio, announced today that they've launched a new arm of the company that aims to reinvent the standards of the window installation market. The company has begun installing their new [Green Energy Windows](#) that boast an impressive energy efficiency rating and long lasting durability, and are widely regarded as the best energy efficient windows available today.

Green Energy of SA has been installing energy efficient products in San Antonio since 2009, and has since expanded their market into surrounding cities including Corpus Christi

,
Austin

,
Laredo

, and most of south
Texas

. The company is best known for installation of highly efficient home improvement products like seamless rain gutters and radiant barriers, but now looks to enter the window replacement market to create all around efficient homes and businesses.

Company owner Richard Ramos said "Energy efficient window installation was the logical next product from Green Energy of SA. Our goal from the beginning has been to help people make their homes more efficient and to save them money on utilities. Our new Green Energy Windows are an amazing product unlike anything on the market today -- they have the potential to really save our customers money."

In conjunction with the launch of the Green Energy Window, Green Energy of SA is currently running a 50% off installation special to spread the word of the new product. "We'd like to see our energy efficient windows installed in every new home in Texas," said Ramos. In addition to
