

## Even in Disaster, Lumos LSX Solar Modules Shine at Western Disposal HQ

Written by Australian Business

---

BOULDER, Colo., Sept. 26, 2013 /PRNewswire/ -- Completed before the epic Colorado floods, Western Disposal's 198kW PV solar awning is a solar milestone as Colorado's largest solar awning. The awning stands over 30 ft tall and has been built to shade Western's large natural gas fueling station.

The durability of the system was tested to its fullest when Colorado was hit by unprecedented rains that caused massive flooding in the state. "The waters from the nearby flooded pond reached the array's closest columns and 3 days of constant rain and wind tested the workmanship of the Lumos

, CEO of  
Lumos Solar

Following the devastation of the floods, Western Disposal called 'all hands on deck' to meet the increasing needs of the local community during the clean up. The trucks and the facility are running at full capacity to bring normalcy to the shaken community as quickly as possible. "Western Disposal is a part of this community. It is important that we help bring things back to normal. The power generated by the Lumos **LSX** modules is helping us do this," comments Frank Bruno  
, President of Western Disposal.

The entire project was designed, constructed and supplied by Boulder, CO based businesses: Lighthouse Solar completed the solar system installation; Lumos Solar supplied the unique frameless
