

PACSlim-5 Portable Heat Pump Offers Compact Design, Versatile Heating/Cooling Options

Written by Australian Business

TORRANCE, Calif., Oct. 16, 2013 /PRNewswire/ -- Atlas Sales & Rentals, Inc. has introduced a portable heat pump that combines a compact design with powerful performance and versatile heating and cooling options. The new PACSlim-5 heat pump delivers 57,100 BTU/hr cooling capacity and 55,700 BTU/hr heating capacity, yet is less than 30" wide, allowing it to roll into narrow spaces where other units can't go. It may be used for outdoor spot cooling and heating or for indoor areas such as offices and conferences rooms, lobbies, stores, classrooms, health care facilities and more.

The versatile PACSlim-5 offers year-round duty and may be used as a portable cooling unit only, a cooler with electric resistive heat, a conventional heat pump, or heat pump with auxiliary electric heat. Units are available in either 208-230 V (single-phase or triple-phase) or 460 V triple-phase power supply, with or without 10 or 15kW resistive heat.

The PACSlim-5 heat pump is designed for durable performance with a powder coated, heavy duty steel cabinet on lockable casters for ease of transport, and removable 16" supply and return duct collars. The unit is factory charged with an environmentally friendly refrigerant. A secure, weather-tight control panel and color-coded Camlock power connectors also contribute to the unit's installation and maintenance ease. Options include a remote thermostat or condensate pump.

The PACSlim-5 unit has an operating range of 65 to 115° F in the cooling mode: In the heating function, the range can vary depending on the mode (electric heat vs. heat pump). It is manufactured in the U.S.A. and is available from Atlas for rental or purchase.

Atlas Sales & Rentals, Inc. is a leading national distributor of portable cooling and heating products as well as portable devices for IAQ and remedial applications, with full-service company-owned offices around the country. For further information on the PACSlim-5 heat pump, go to: www.atlassales.com/pacslim5 . For general information, contact Atlas Sales &
