

MAYWOOD, N.J., Oct. 2, 2013 /PRNewswire-iReach/ -- NetBidON is an online interactive service directory that connects and networks consumers and service providers in an online open fair competitive bidding Process.

According to Spears Marketing, 84% of searchers are looking online for a local business. Studies have shown that 92% of local searches will eventually convert to a sale. NetBidON online fair competitive bidding process is bringing transparency and competition; to drive more businesses and better results that will empower both consumers and business entities.

Forrester Research says consumers will spend 327 billion dollars online in 2016. NetBidON online fair competitive bidding process is launching in November 2013 to help local service providers and entrepreneurial mindset individuals to exploit all the business opportunities that online consumers offer.

On netbidon.com, consumers can publish request for proposals for service providers to respond with a bid by submitting a service proposal. Request for proposals can be any service request from home repair to housekeeping services.

For free, consumers can save time and money by publishing any service requests from home repairs to housekeeping services on netbidon.com.

On netbidon.com, service providers from professionals to non-professionals can create a network and sale their services to customers who are soliciting respective services. **For Free, service providers can register on netbidon.com to create a customized business profile page to promote their services.** □ **Service providers can invite customers and affiliates to become a fan on their business profile page.** □ **Service providers can share news and updates about their businesses with fans on business profile page.**
