A Fund's distribution rate may be affected by numerous factors, including changes in realized and projected market returns, Fund performance and other factors. There can be no assurance that an unanticipated change in market conditions or other unforeseen factors will not result in a change in a Fund's distribution rate at a future time.

At this time the Funds believe that a portion of the October distributions may be comprised of amounts from sources other than net investment income. If that is the case, you will be notified in writing. Further information will be available prior to the payment date at <http://funds.eatonvance.com>. The final determination of tax characteristics of each Fund's distribution will occur after the end of the year, at which time it will be reported to the shareholders.
