

NUNEATON, England, October 6, 2013 /PRNewswire/ --

IC Solutions 24/7 Limited proudly presents the latest innovation in ENVIRONMENTAL DECONTAMINATION Services for your facilities,

The Sentinel Room Fogger

The CE Registered Sentinel Fogging System produces an atomized dry mist comprised of positively charged hydroxyl ions that go up, around and under all exposed surfaces killing 99.99 % of bacteria, viruses, spores to include mould, and fungi. The Sentinel activation technology is facilitated by the chemical interaction of a 6% hydrogen peroxide and .01% AgNo3+(silver cations). The combination of the hydrogen peroxide ions and the silver produce the 99.99% kill rate. The fogging by-products are the benign elements water and oxygen. This is the most effective, yet least caustic decontamination method available today and is safe in food premises, around people and your animals. The fogging procedure will do no damage to sensitive electronics, surfaces or substrates. The CE registered Sanosil S010 Disinfectant Solution can be fogged or sprayed (no wipe). The Sentinel Fogger is lightweight (22 kilo), portable, quiet, and the process is odourless and extremely effective.

The Sentinel room Fogger can decontaminate a 200 cubic metre room in about 60 minutes and the room can be evacuated using the HVAC system or allowed to dwell overnight and naturally dissipate. The Sentinel Fogger S010 Disinfectant Solution is CE Approved, and is certified for use in the Sentinel Fogger.

Available to purchase, or if you prefer - call our team to sanitise your workplace.

Innovative Solution to an Issue That Costs Millions in Staff Absenteeism

Written by Australian Business

PROTECT YOUR FACILITY AND SAFEGUARD YOUR STAFF and CLIENTS

Sanosil S010 Disinfectant is a proprietary formula based on a unique stabilization process that blends hydrogen peroxide and silver to create a broad-spectrum, safe and eco-friendly solution for killing germs. EPA registered and independently tested, Sanosil kills 99.99% of all bacteria, viruses, mould and fungi safely including MRSA, H1N1, Rhinovirus, E.Coli, Salmonella, and more. With one Sentinel Fogger unit, you can treat up to 10,000 cu ft. at a time to ensure a germ-free safe space for you, your clients and staff. The IC Solutions Sentinel Fogger and Sanosil Disinfectant are a team unmatched in killing germs, easily and effectively.
