

DUBLIN, Ireland, January 13, 2014 /PRNewswire/ --

Research and Markets (http://www.researchandmarkets.com/research/cnsdrh/global_and_china) has announced the addition of the ["Global and China Aluminum Profile Industry Report, 2013-2016"](#) report to their offering. (Logo: <http://photos.prnewswire.com/prnh/20130307/600769>)

Since 2012, due to China's economic slowdown, global economic stagnation and trade protection measures taken by Europe, U.S. and other developed countries on some aluminum products from China, the fast-growing Chinese aluminum processing industry has been confronted with some pressure. However, given the increasingly wider range of applications of aluminum profiles and especially driven by the trend of lightweight transportation, production and sales of aluminum profiles are growing.

In 2012, China's output of aluminum profiles was about 13.11 million tons, up 14.0% from a year earlier. Seen from product mix, industrial aluminum profile industry is developing rapidly, and the full-year consumption in 2012 reached 4.024 million tons, occupying 33.6% of total consumption, up 11.22% year-on-year.

As the demand for industrial aluminum profiles keeps rising, listed companies are expanding their existing production lines or setting up new production lines. Among the current aluminum profile projects being constructed by listed companies, industrial aluminum profile projects accounted for over 80%, the majority of which will be put into production before 2015.

In terms of the performance of listed companies in the first half of 2013, only Shandong Nanshan Aluminum Co.,Ltd. and Suzhou Lopsking Aluminum Co., Ltd. showed a decline in revenue, in which Nanshan Aluminum's revenue fell 2.15% compared with the same period of last year; and Suzhou Lopsking dropped by 1.28% year-on-year. Liyuan Aluminum is the company that presents the fastest growth in performance. In H1 2013, its revenue surged by 29.71% year-on-year.

Considering gross margin by product, the industrial aluminum profiles of China Zhongwang are with the highest gross margin, which was 28.0% in the first half of 2013; Liyuan Aluminum enjoys the highest gross margin in construction aluminum profiles, 23.9% in H1 2013.

Key Topics Covered:

1. Overview of Aluminum Profiles Industry
2. Development of Chinese Aluminum Profiles Industry
3. Market Segments Analysis of China Aluminum Profiles Industry
4. Key Companies Worldwide
5. Key Listed Companies in China
6. Non-Listed Companies in China
7. China Aluminum Profiles Industry Forecast

Companies Mentioned:

- Aleris International Inc.
- AsiaAlum
- Changsha Zhensheng
- China Zhongwang
- Fujian Minfa Aluminium
- Fujian Nanping Aluminium
- GuangDong HaoMei Aluminium
- Guangdong Fenglu Aluminium
- Guangdong Weiye
- Guangdong Xingfa Aluminium
- Guangya Aluminium
- Jilin Liyuan Aluminum
- Nippon Light Metal
- Norsk Hydro
- Orkla ASA
- Qinghai Guoxin Aluminum
- Raufoss Extrusion
- Sapa AS
- Sapa Chalco
- Shandong Conglin
- Shandong Nanshan Aluminum
- Suzhou Lopsking Aluminum
- Swedish Assets
- Taishan Kamkiu Aluminium
- YKK AP
- Zhejiang Dongliang New Material
