August 30, 2013 04:10 AM Eastern Daylight Time

--([BUSINESS WIRE](#))--opvizer is specialized in virtualization and Cloud Computing. The company is an independent producer of Software- and SaaS solutions for intelligent data processing centers. These solutions include automation and management of virtual IT infrastructures within heterogeneous data processing centers as well as solutions for the prevention of errors and failures. Several local and global companies of different sizes already count on the opvizer software solutions. In February 2012 an own company was founded exclusively focusing on the opvizer solution, called opvizer GmbH based in Vienna. Product development already started during 2010, within icomasoft AG. Dennis Zimmer is founder and CEO of opvizer GmbH. For further information please check www.opvizer.com
