

PASADENA, Calif.--([BUSINESS WIRE](#))-- [Guidance Software, Inc.](#) (NASDAQ:GUID), the World Leader in Digital Investigations™, announced that its EnCase® software was named Best Computer Forensics Solution at the 2014 SC Awards Europe Awards. The award was announced on April 29, 2014, at the SC Magazine awards gala during the InfoSecurity Europe conference in London. This matched its performance in the United States, as EnCase was also named the *SC Magazine* 2014 Reader Trust Award winner in the computer forensic tool category during the RSA® Conference in San Francisco in February.

EnCase was selected by expert judges drawn from the senior ranks of the information security profession for their experience and impartiality. The judges represent major European and global brands including investment and retail banks, retail groups, airlines, insurance groups, and food groups as well as prestigious government departments.

"Guidance Software is committed to continuously innovate and produce best-of-breed digital investigations products that address the needs of organizations throughout the world," said Victor Limongelli, president and chief executive officer of Guidance Software. "This prestigious award confirms our dedication to effectively serving our European customers."

In addition to taking top honors at the 2014 SC Awards Europe Awards ceremony, EnCase also received a five-star rating in the SC Magazine product review last week. The independent reviewer stated, "EnCase has been around a long time and, by most accounts, created the definition of how a computer forensic product should look." Furthermore, "It has a lot of innovation and is continuing that tradition."

Guidance Software's EnCase is a powerful, judicially vetted platform that provides the foundation for corporations, government agencies and law enforcement to conduct thorough and effective digital investigations of any kind, including intellectual property theft, incident response, compliance auditing and responding to e-discovery requests – all while maintaining the forensic integrity of the data. EnCase allows customers to conduct more complete investigations than its competitors with an additional integration with a cloud-based e-discovery platform, as well as security information and event managers (SIEM) for automated incident response.
