

(PRLEAP.COM) Bellevue, Wash., July 20, 2013 – Technical staffing company WideNet Consulting has been recognized as an "Eastside Fastest Growing Private Company" for 2013 by the Puget Sound Business Journal – ranked 25 out of 50 fastest growing companies. The selection is based on WideNet's net revenue growth over the last three calendar years – 2010, 2011 and 2012. The fastest growing companies were announced by the newspaper today, and honored at a July 18 reception. www.widenetconsulting.com

WideNet Consulting is based in the heart of the Seattle area's technology center on the eastside of Lake Washington, home to Microsoft, T-Mobile USA, Nintendo of America, Expedia and numerous other high-tech, gaming, healthcare and financial services companies.

In one recent project, WideNet Consulting assisted real estate giant Colliers International in developing a new centralized IT team at its Seattle headquarters. WideNet Consulting helped recruit and hire three director level roles, and other technical and contributor positions, including application development managers, architects and senior developers. "There is no way we could have gotten it done as fast and successfully without them," said Veresh Sita, CIO for Colliers International.

In each of the last three years WideNet Consulting has achieved more than 100% annual revenue growth. The company plans to expand with new offices in other areas in the Western U.S., and to further enhance its technology and resource capabilities for serving clients.

"The market for solid IT resources and talent is at a blistering pace," said Kory Avaiusini, WideNet CEO & Managing Partner. "A key driver of our growth and success is our commitment to people. Unlike much of the recruiting industry, where it's common to treat people as numbers, WideNet Consulting focuses on deep, ongoing connections with job candidates and employers."
