

FACILITY | ONE®

(PRLEAP.COM) (Louisville, KY, September 12, 2013) — Ms. Dawn Schafer, co-founder of FacilityONE, will speak at the ASIS 2013 Annual Security Expo in Chicago, IL on Wednesday, September 25, 2013. Ms. Schafer will join security experts and professionals in a special education session, "Adopting Interactive Mapping to Educational and Corporate Campuses." The session will explore the security applications of interactive blueprints, such as the [FacilityONE® SMARTPRINT®](#) technology, in first responder and emergency situations.

Powered by SMARTPRINT technology, the FacilityONE Solution is an intuitive graphical interface that provides a complete view of a facility's floor plans, assets and systems. The Company's SMARTPRINT technology was highlighted in Security Management Magazine's July cover story, "[Showing First Responders the Way](#)," which looked at FacilityONE's use by the security department of Cincinnati State Technical and Community College.

Ms. Schafer states: "This is a wonderful opportunity to discuss with the security community the importance of having well organized information accessible to security personnel in times of emergency. I am excited to be working alongside such well-regarded professionals in the security industry."

In addition to Ms. Schafer, the distinguished panel members are Ron Martin, Executive Director of Open Security Exchange; Michael Wylie, CPP,PCI, Director of Public Safety and the Chief of Police at Cincinnati State Technical and Community College; Tom McDonald, CEO of BeSafe; and Abigail Boyer, Director of Communications & Outreach at the Clery Center for Security on Campus. [Visit the ASIS 2013 website](#) for more information on this special education session.

About Dawn Schafer

Dawn Schafer is a co-founder of FacilityONE, a leading provider of cloud-based facility management software. She serves as an advocate for FacilityONE's security applications, as well as working with the company to cultivate strategic relationships and investors.

Ms. Schafer is also the Founder and Executive Director of HAWK (Helping America Watch over its Kids), powered by the FacilityONE SMARTPRINT technology. Dawn has always held a passion for the safety of our children, and is on a mission to help our first responders obtain the information they need to help save lives and property.

About FacilityONE

Organize. Access. Transform.

FacilityONE transforms any facility's fragmented information into one organized, easily accessible solution for intelligent management. FacilityONE provides CMMS, CAFM, and EAM solutions for many industries including Hospitals, Schools & Universities, Manufacturing, and Data Centers, to name a few. The CMMS system offers a flexible preventive and corrective maintenance solution that easily integrates into client's processes.

Using cloud technology, our web based facility management software solution makes information available anywhere and anytime to those who need it. FacilityONE's web based CMMS increases communication between requester, management, and the technician further enhancing efficiency and compliance reporting.

The key to the simplicity of the solution is in the SMARTPRINT® interface. The SMARTPRINT interface is a graphical floor-plan representation of the facility that enables point and click facility information gathering and sharing.
