

Global Payout Provides Prepaid Cards To Strategic Network Solutions Group

Written by Australian Business

SAN DIEGO, Sept. 17, 2013 /PRNewswire/ -- Global Payout, Inc. (OTC Pink: GOHE) has received a signed agreement with Strategic Network Solutions Group (SNS), to supply its members with its reloadable co-branded prepaid cards. Global will provide each of the SNS affiliates with their co-branded prepaid card for enhancing their existing loyalty reward program. Presently, SNS has over 2,500 U.S. merchants associated with the SNS network who offer loyalty reward points for utilizing merchants that are associated with the network. SNS anticipates a significant increase to 10,000 members by mid-year 2014. The Co-Branded Prepaid card will enable SNS merchants to add and retain customers through enhancing their loyalty program with an FDIC insured prepaid card. SNS members will now be able to access their funds at nationwide ATMs, and have access to on-line and in-store Point of Sale purchases. Additionally, SNS Prepaid card holders will have immediate access to the WellCard Health™ comprehensive pre-negotiated health care discount program that features, not only pharmacy discounts, but a comprehensive range of discounted health services.

"We are fortunate to support a client like SNS that is already working closely with their merchants and customers to build loyalty and rewards incentive programs. We anticipate adding an additional 15,000 prepaid cards based upon their growth for 2013 and 2014," says James L. Hancock, CEO, Global Payout, Inc.

"A co-branded prepaid card program which highlights our Strategic Network Services brand will help towards meeting our goal of helping our merchants grow new customers and retain existing customers," says Nick Giacaman, President of SNS. "The prepaid card solution creates new value added services for our company to offer the merchant and customer base in our vertical markets."
