

(PRLEAP.COM) Dallas, TX - CyberlinkASP, the [leader in hosted virtual desktop and private cloud solutions](#), is proud to announce its inclusion in CIOReview magazine's list of the 20 Most Promising Cloud Computing Companies.

To address the burning need of CIOs to find the solution providers that fit their requirements, CIOReview magazine presents the '20 Most Promising Cloud Computing Companies'. These organizations are helping enterprises move to the cloud and are developing products and services to make this move seamless. A distinguished panel comprising CEOs, CIOs, VCs, and analysts including the CIOReview board scrutinized several companies and finalized the list of '20 Most Promising Cloud Computing Companies'.

"Our team continues to innovate and execute, and that is what really sets us apart", said Michael B. Sikorski, CIO of CyberlinkASP. CyberlinkASP continues to set the standard for desktops-as-a-service. Providing remote access since 1999, CyberlinkASP has emerged as one of the industry's major innovators and thought leaders.
