

LEHI, Utah, Sept. 24, 2013 /PRNewswire/ -- eFileCabinet, Inc., the expert paperless software solution for business, today announced the launch of its eFileCabinet Online document management solution for insurance companies. Insurance companies and agents can now easily deploy a customized version of the eFileCabinet solution to increase productivity by accessing and managing their files 24x7. In addition, insurance agents will have the ability to safely share files with both their home office and their clients via the eFileCabinet Mobile Apps on both the iPad/iPhone (iOS) and Android platforms.

"The focus of eFileCabinet has always been to help increase the productivity of paper-intensive businesses that have high customer interaction, and insurance agents definitely fit that target," said Matt Peterson, President & CEO of eFileCabinet. "These days, conducting business doesn't always happen in the office or during normal business hours. With eFileCabinet Online, the Agents' business can be more efficient by enabling an anytime/anywhere business model while helping them meet important regulatory compliance needs."

With eFileCabinet Online, insurance agents can capture, view, download, archive and share their documents from any PC browser, cutting down the expenses of paper-heavy processes. All data is redundantly backed up for business continuity and compliance purposes. Clients of insurance agents frequently experience a much faster level of communication, measurably improved quality of service and ease of doing business.
