

(PRLEAP.COM) Hayden, Idaho – Systems Technologies, a leading manufacturer of [wireless nurse call and emergency response systems](http://www.wirelessnursecall.com) , has announced that their flagship product, Vision Link Wireless Nurse Call System, has been fully tested and listed to the new Edition 7 standard for UL1069 Hospital Signaling and Nurse Call Equipment.

In states that require Edition 7 certification, Vision Link can be installed in all care levels including skilled and acute. This makes Vision Link ideal in rural hospitals and in continuing care retirement communities that offer independent living as well as assisted living and skilled care. The system offers eight types of staff notification including pager, cell phone, wireless phone, LED readerboard, email, two-way radio, central station and more. Nursing staff can additionally be equipped with netbooks or IPADs that operate as remote viewing consoles for the Vision Link nurse call system in addition to providing access to electronic charting.

Vision Link combines a multitude of functionality designed and engineered to provide patient focused care along with safety and security for residents and staff alike. Each unit, floor or building can be equipped with a console that displays calls from just that area. The server handles all staff notification and alarm escalation plus allows management to enter programming that automatically uploads to each unit console. The server can also send alerts to selected managers when calls in their unit are unanswered or exceed desired response times.

Whether on-site or off-site, managers can log in with their password and view all alarm events real time, obtain call analysis reports and change staff notification assignments. In addition to a wealth of information and features in a very cost effective package, Vision Link remains one of the easiest to use nurse call systems on the market and is manufactured and supported by a company with a 20 year record of providing reliable wireless system solutions to the healthcare industry.
