

Business-Critical SharePoint

(PRLEAP.COM)

CAMPBELL, CA, USA - November, 11, 2013 SpadeWorx, a pioneer in User Centered Software Engineering (UCSE™), today announced it's inclusion in Microsoft Corporation's exclusive Business-Critical SharePoint (BCSP) Partner Program. The Business-Critical SharePoint (BCSP) partner program is focused on expanding the market for building and delivering solutions that generate a business impact through advanced SharePoint solutions.

The program consists of leading Microsoft partners worldwide, both independent software vendors and systems integrators, who provide the technology and the business expertise required to help customers to:

Connect line-of-business applications into SharePoint, so people can find the information they need. Make better decisions based on relevant and timely information while ensuring compliance around core business processes. Boost return on investment through faster time-to-market, process efficiencies, reduced risk, and lower IT total cost of ownership. "Joining BCSP program is an honor for SpadeWorx as a recognition for our commitment to the Microsoft SharePoint Server technologies and "Social Workplace" solutions we build for our customers" said Shekhar Dhongade, Chief Operating Officer – Americas for SpadeWorx. "SharePoint is not only helping in Communication and Collaboration but also extending into the Line of Business (LOB) applications to extract business critical information. Thus enabling effective business decision-making in a digitally networked enterprise."

"BCSP program enables SpadeWorx to sharpen its focus on building enterprise scale SharePoint solutions", added Mandar Bhagwat, Co-Founder and CTO at SpadeWorx. "For many of our customers connecting Line Of Business applications with SharePoint is important. It automates business processes and surfaces the information for faster decision making. We are excited to be part of Microsoft BCSP partner community enabling knowledge sharing and global reach"

SpadeWorx has pioneered the "User Centered Software Engineering™" (UCSE™) methodology to design and develop software solutions that are relevant and contextual to the end users. The SharePoint Center of Excellence (CoE) at SpadeWorx has worked with many large and medium sized corporations across the globe in building and deploying rich and intuitive intranet solutions driving increased employee engagement for better business results.
