

Take Advantage of IT Sales and Procurement Services from SACA Technologies

Written by Australian Business

(PRLEAP.COM) Anaheim Hills, Calif. – November 15, 2013 – SACA Technologies, a provider of IT Services Irvine businesses have relied on for more than 15 years, is dedicated to providing its clients with assistance in every aspect of their business's IT, including procurement. Through their Sales and Procurement Services, SACA Technologies can acquire products that their clients need (such as hardware and software) for below market prices.

"After 15 years in business, we have established partnerships with leading hardware manufacturers and software developers," CEO Alexander Saca said. "Because of these partnerships, our team delivers those products for our clients quickly and in a cost effective manner. Our sales and procurement allow us to be our clients' IT Allies every step of the way, from acquiring the products, to installing and maintaining them so that our clients can focus on other aspects of their business."

Of course, businesses can purchase IT products on their own, but acquiring them through SACA Technologies' sales and procurement services drastically reduces the hassles associated with buying new equipment. Technicians familiarize themselves with their client's business and needs so they can determine what products would work best for that company. This means that the business owner, managers and employees do not have to spend their time doing research to find what products are available and which ones work best for their needs. SACA Technologies technicians are always up to date on the latest technology products and prepared to give expert advice.

In addition to being able to provide quality IT equipment to their clients at good prices, the sales and procurement services offered by the Orange County computer repair providers include asset management, warranty monitoring and patch management; these services ensure that a business's hardware and software are always up-to-date so that they operate at the most efficient level possible. And like all of their solutions, SACA Technologies' sales and procurement services come backed by around-the-clock technical support, so if something goes wrong with a client's hardware or software, a technician is always available to assist them, no matter what time of day or night it is.

SACA Technologies is a provider of comprehensive IT services to businesses in Los Angeles County, Riverside County, San Bernardino County, San Diego County, and Orange County. Computer repair, managed IT services (which includes around-the-clock network and performance monitoring, data backup & disaster recovery, fixes & repairs, security and alerts & reporting), IT service & support, sales & procurement and security and virtualization services are some of the services that they offer.
