

## IT Acceleration Teaches About eDiscovery and Digital Forensics

Written by Australian Business

---

( [PRLEAP.COM](http://PRLEAP.COM) ) [Experts in Digital Forensics](#) from IT Acceleration are presenting "The Evolution of eDiscovery and Digital Forensics - An Update on Technology Challenges and Legal Requirements", hosted by the Cape Institute for Professional Education on Wednesday, December 18, and Monday, December 23, 2013. It is offered at the Hampton Inn in Phoenixville, PA on December 18 from 8AM to 12PM, and at the Bensalem Holiday Inn in Bensalem, PA on December 23 from 12:30PM to 4:30PM. The cost of the course is \$124.

Regardless of practice area, attorneys are frequently required to be responsible for preserving or discovering electronic data. The team from IT Acceleration will review corporate procedures for data retention and archiving, and demonstrate a real-time investigation involving a civil matter. Participants will leave with a better understanding of the computer forensic process and its use for critical electronic data.

David Yarnall, President of IT Acceleration says, "We enjoy going out to present courses like these. Proper ediscovery and data collection can be critical in some legal cases, and anyone involved needs to be educated on the best practices and forensically sound procedures. "
