

TeamLab Rolls out Personal Docs for Free Individual Use

Written by Australian Business

Document collaboration made easy with Teamlab Office

(PRLEAP.COM) TeamLab Office , a cloud solution for SMB, launches an advanced doc editing application for personal use. Distributed at no charge, TeamLab Personal provides an instant access to online file editing and sharing to a wider category of users.

The [Personal edition](http://TeamLab Personal) combines the multifunctionality of text, spreadsheet and presentation desktop solutions with the benefits of online co-editing and commenting. Being the first online editors developed with the HTML5 Canvas technology, they boast an array of strengths unavailable in other realtime word-processors:

the input that is always identical to the output: a processed file keeps the same style, paragraphs, symbol and line spacing etc. while displaying in any browser on any OS as well as
