

WALNUT CREEK, Calif., Dec. 27, 2013 /PRNewswire/ -- Calling, downloading apps and surfing the web on the Verizon Wireless network is now easier and faster for residents and travelers thanks to a new cell site in Hanford. The site improves 4G LTE wireless network coverage and capacity around the Hanford Municipal Airport along Grangeville Boulevard, Iona Avenue, Highway 43 and 14th Avenue.

Since being founded in 2000, Verizon Wireless has invested more than \$7.8 billion in its California network. Nationally, the company has invested more than \$80 billion over that same period to increase the coverage and capacity of its network, and to add new services.

The network upgrade is part of the company's ongoing investment to keep improving and strengthening the nation's largest and most reliable wireless network.

About Verizon Wireless Verizon Wireless operates the nation's largest and most reliable 4G LTE and 3G networks. The company serves 101.2 million retail customers, including 95.2 million retail postpaid customers. Headquartered in Basking Ridge, N.J., with nearly 72,000 employees nationwide, Verizon Wireless is a joint venture of Verizon Communications (NYSE, NASDAQ:

[VZ](#)

) and Vodafone (LSE, NASDAQ: VOD). For more information, visit
